The Lab Manual to accompany Automotive Service, 4e allows students to put their knowledge of automotive systems to work. Activity sheets reinforce theory learned in the core text through parts identification exercises, matching exercises, and fill-in sheets. The second part of the Lab Manual includes a wide variety of hands-on worksheets that emphasize practical, real-life skills needed to service today's automobiles. References to current NATEF Standards and NATEF's General Service Technician Program Standards are included on all relevant worksheets.
