Once a week, a group of curious farmyard animals meet behind the chicken coop and swap theories about that huge, glowing ball in the sky the humans call “The Moon.” Some of them believe it’s an illusion of some sort, some believe it’s alive and others think it’s a place somewhere in the sky. As for Elsa, the cow, she’s not sure about any of those theories, but she’s willing to do anything in her power to find out the truth. So begins Elsa’s journey in search of her dreams - a journey full of twists and turns that will take her from the comforts of the farm into the tricky outside world, and maybe, just maybe, to the furthest reaches of space. If you’re looking for an all-ages story that will inspire and uplift, let A.C Louis’ unique style and voice carry you to a world which promises to teach, touch and entertain.

Packed with humor and beautifully illustrated throughout, The Cow and The Moon is a thoughtful, whimsical story about daring to go after the things you want, in spite of what might stand in your way. A cast of cats, cattle and constellations welcomes you to a world that promises to warm the heart and stretch the imagination.
