Mind Games, book eleven in the Sam Smith Mystery Series. Each book in the series contains a complete story and can be read as a stand-alone. Each story contains approximately 50,000 words and runs to 240 printed pages. A riddle wrapped in a mystery inside an enigma.

Sasha Pryce, a teenage chess prodigy, presented me with a problem. She wanted me to track down Steve Chapin, her coaching assistant. Steve had mysteriously disappeared, leaving no clue as to his whereabouts. However, Sasha insisted that I should follow her strict instructions - her father, eminent pharmacologist Professor Christian Pryce, must not learn of my investigation. Meanwhile, Professor Pryce had hired a handsome bodyguard, Blake, to protect Sasha. For what reason? She had no idea. And to complicate matters further, Blake decided to cast a lascivious eye over my romance-shy friend and assistant, Faye Collister. Mind Games, a riddle wrapped in a mystery inside an enigma, an exploration of the many aspects of love.
